

TMAH onside dilution system

-  **Fast return of invest for a 1000 liter mix batch**
Break even within 2–6 month depending from your chemical costs and consumption
-  **TMAH dilution capacity 2,38 or 2,48 % up to 9000 l/day**
(4500 l/day including surfactant-spiking)
-  **High flexibility**
easy to change dilution ratio and surfactant dosing
-  **Excellent Process Performance**
extremely precise load cells for metering
very accurate dosing pump for surfactant spiking particle and metal neutral
-  **Full Process control**
Conductivity Sensor to approve homogeneous mixture
TMAH concentration sensor (titration)
Surface Tension Monitor
-  **High reliability and optimal serviceability**
selected components from world wide market leaders
redundant pumps and filters
small footprint
